

SERPOLET : Stratégies d'EntRée en PrOduction d'un vignobLe Enherbé Totalement

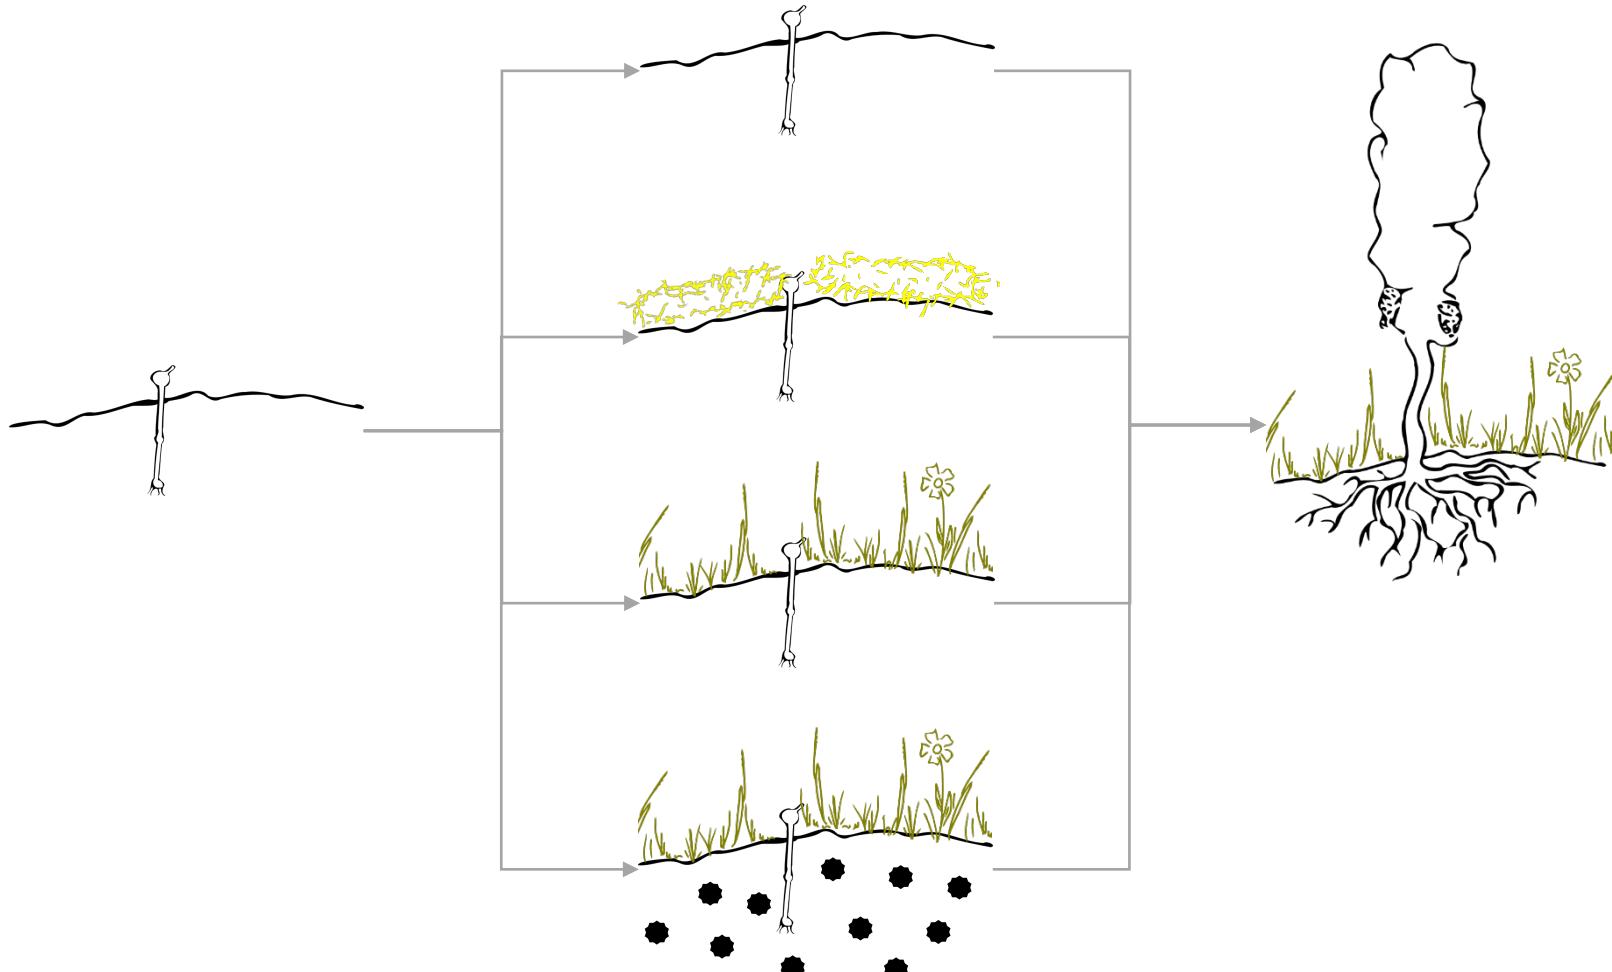

David LAFOND
IFV Val de Loire Centre

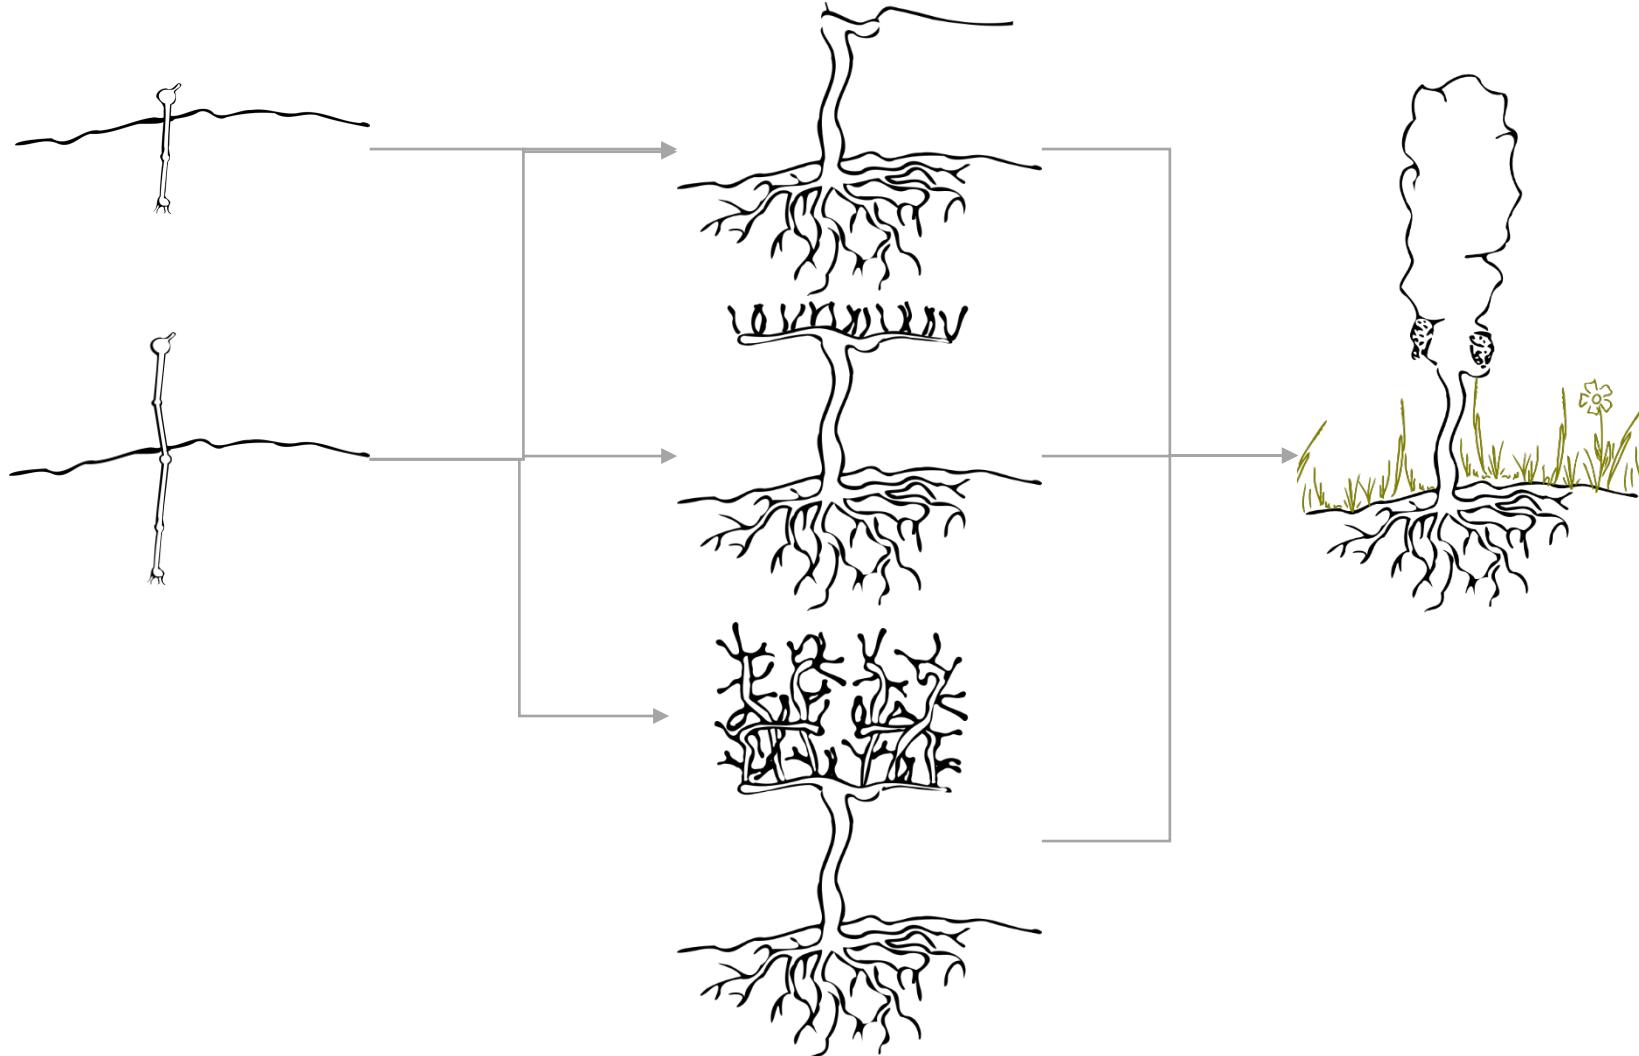

Comment gérer l'implantation d'un vignoble enherbé totalement ?

Modalités d'entretien du sol

Modalités de système de conduite

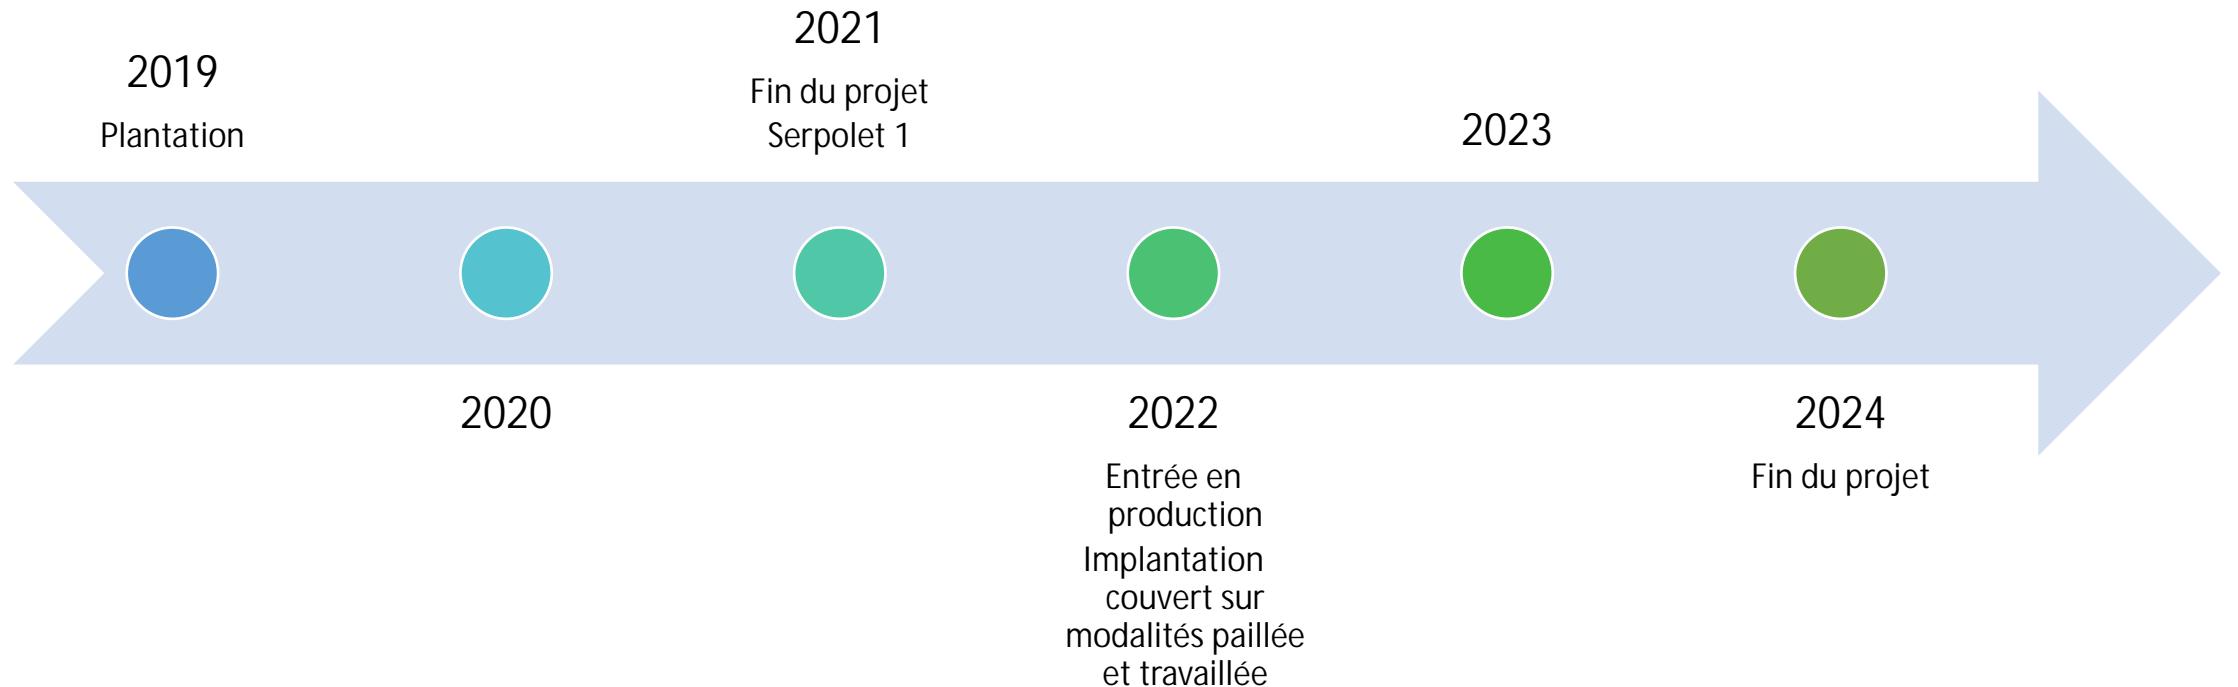

Taille en haie semi-minimale

Taille en haie buissonnante

Déroulé

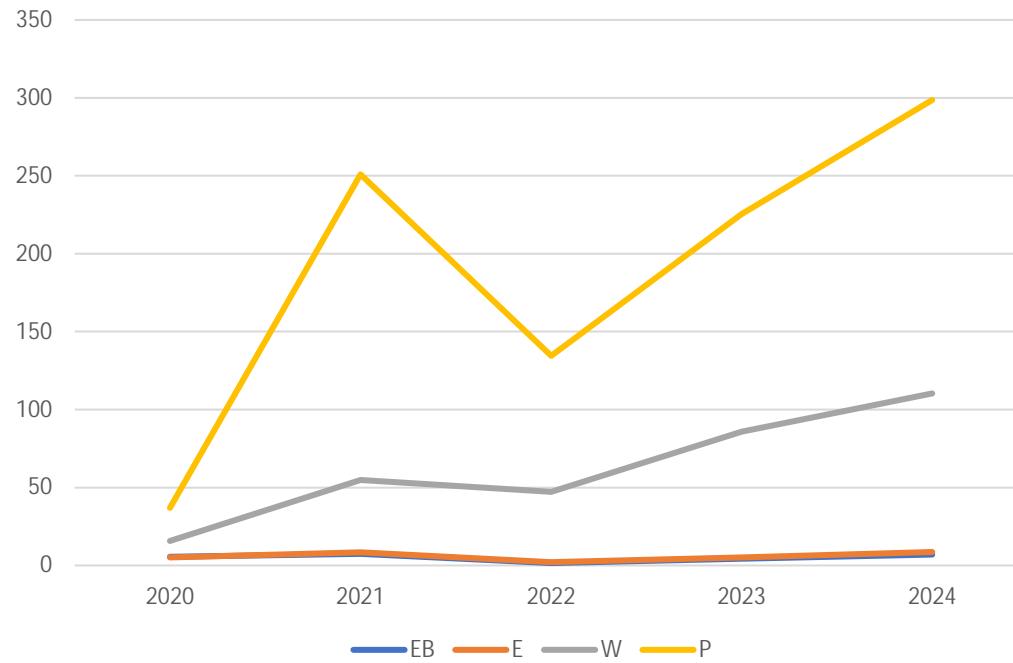

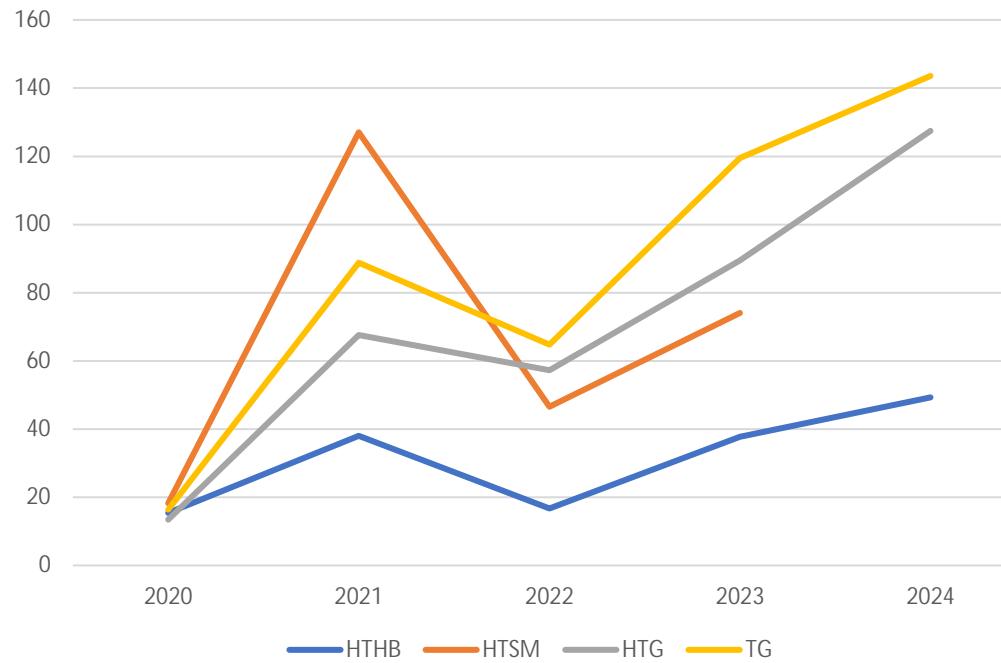

Résultats

Croissance de la vigne

Poids de bois de taille selon type d'entretien du sol

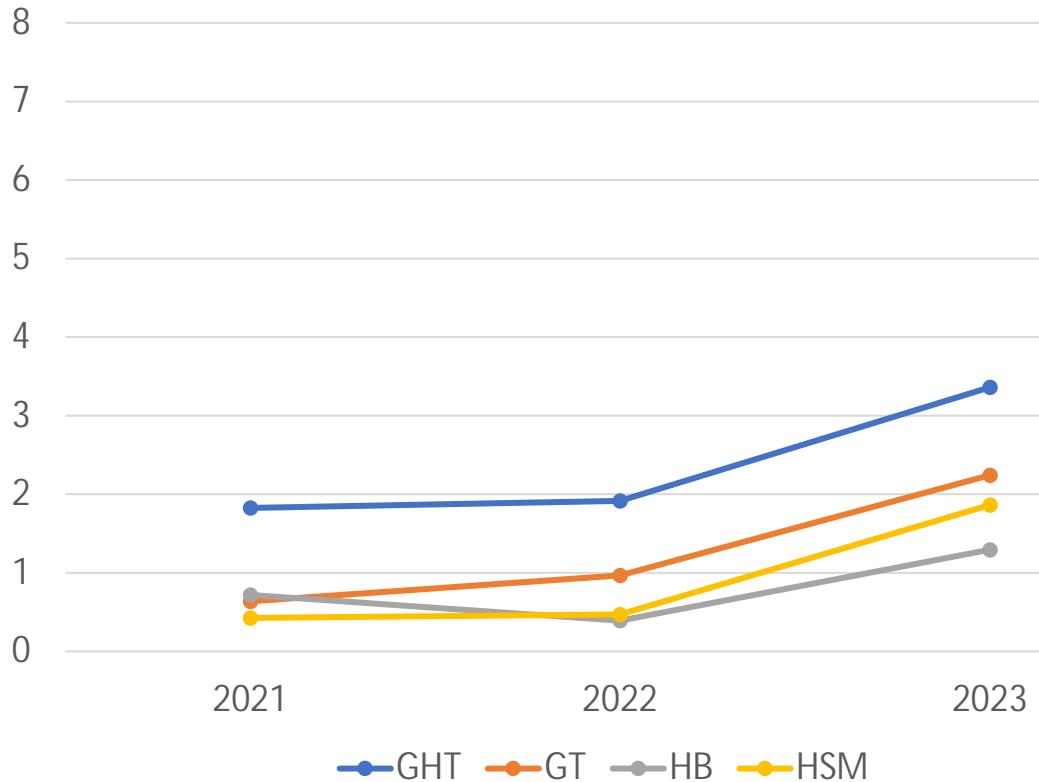

Poids de bois de taille selon mode de conduite

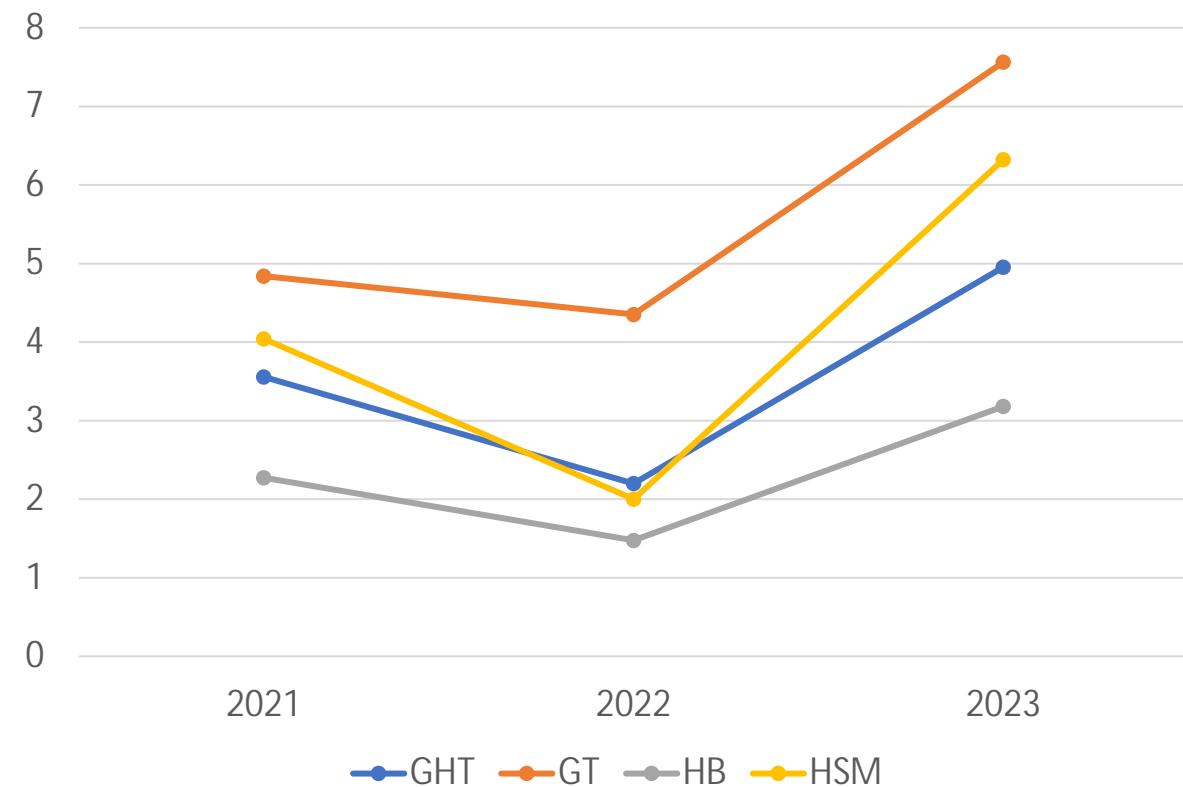

Croissance par analyse d'images

Sol Travailé

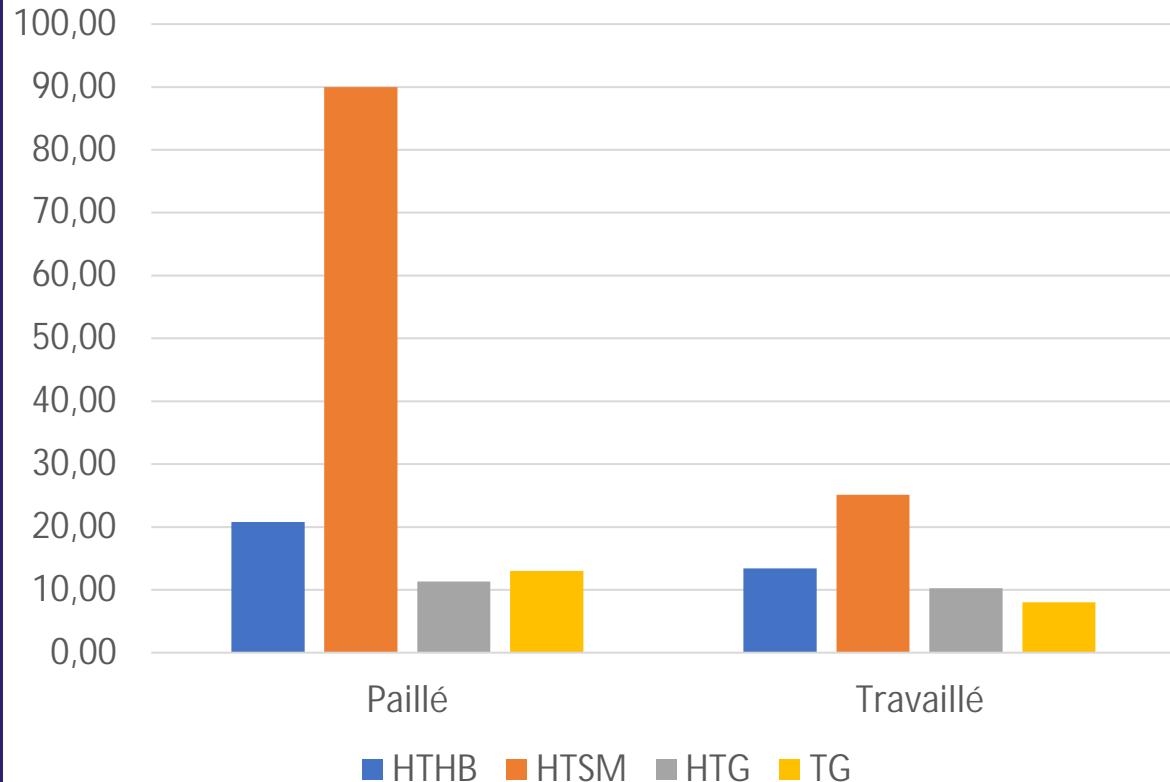

Sol Paillé

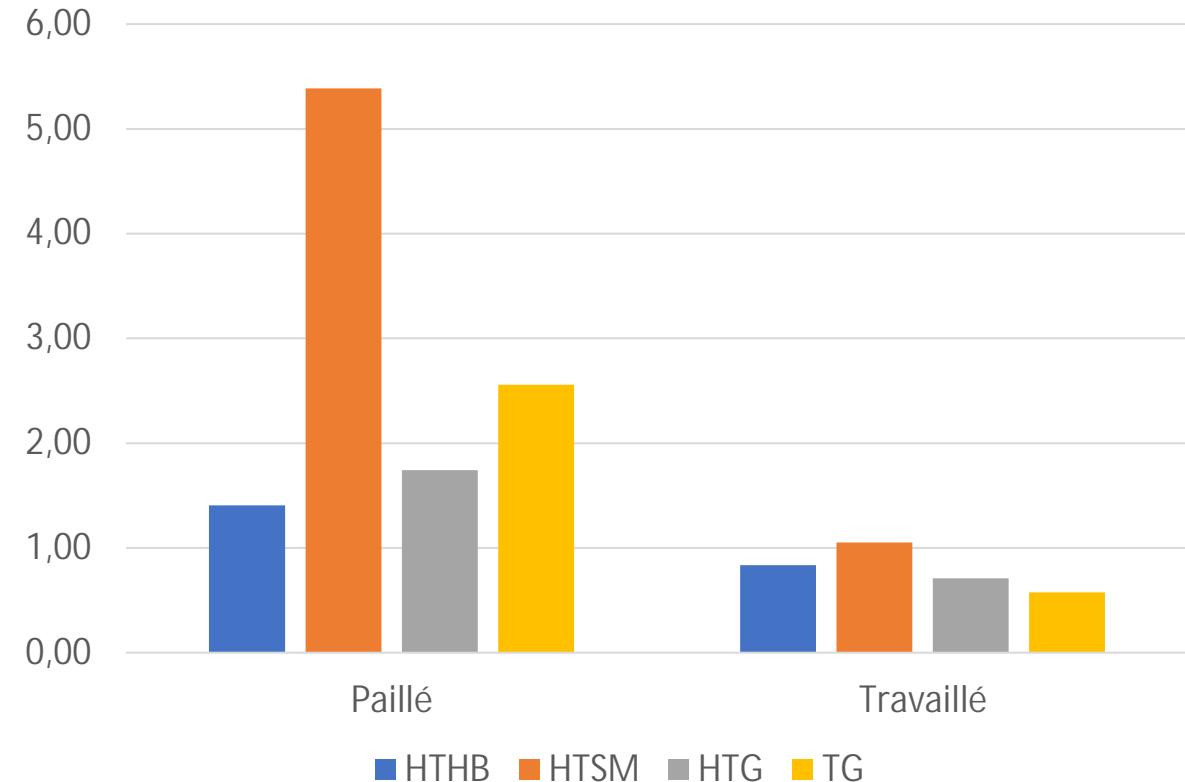

Composantes du rendement

Nombre de Grappes par cep

Poids de récolte par cep (kg)

2022

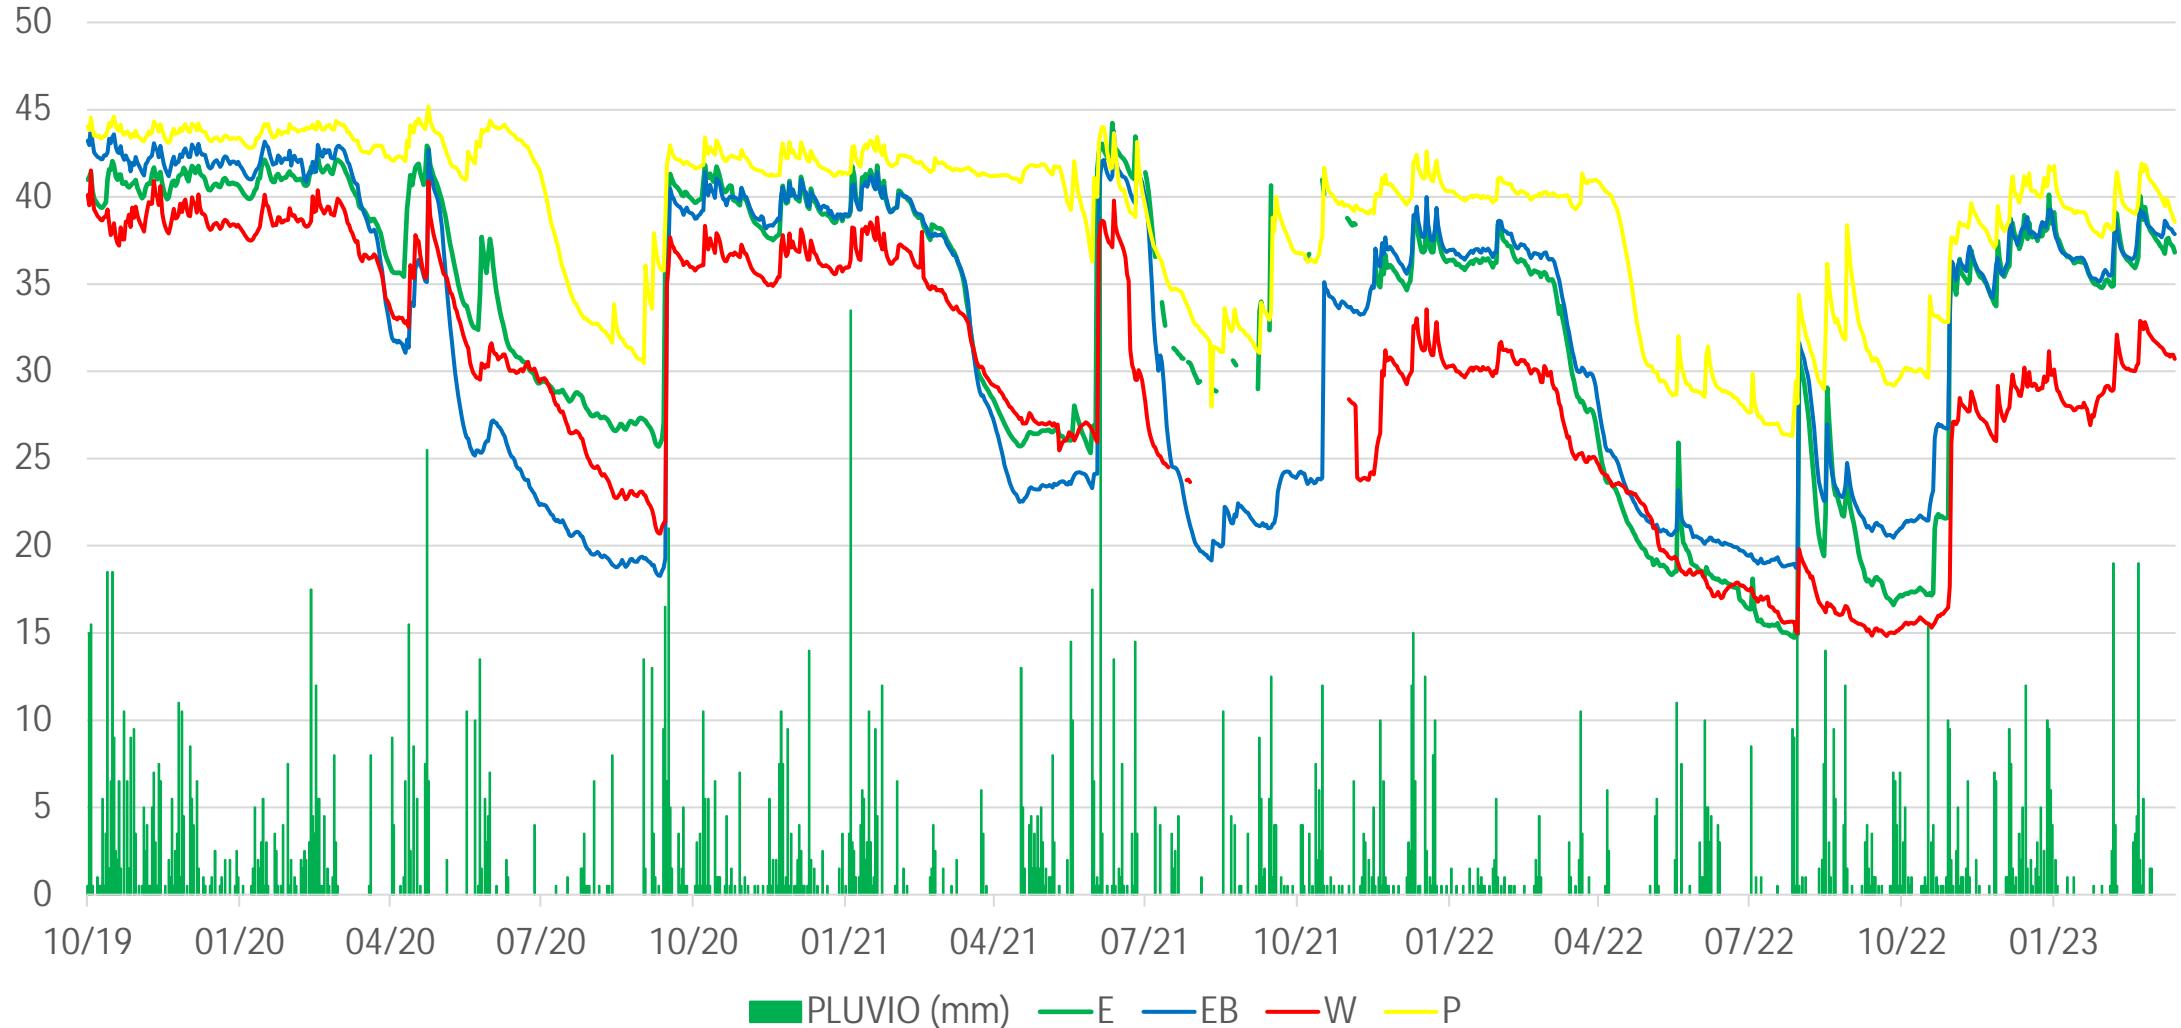

2024

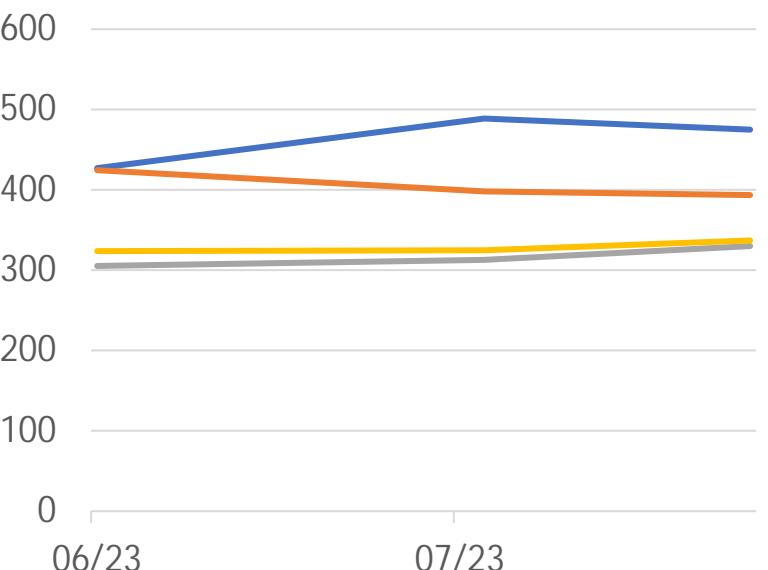

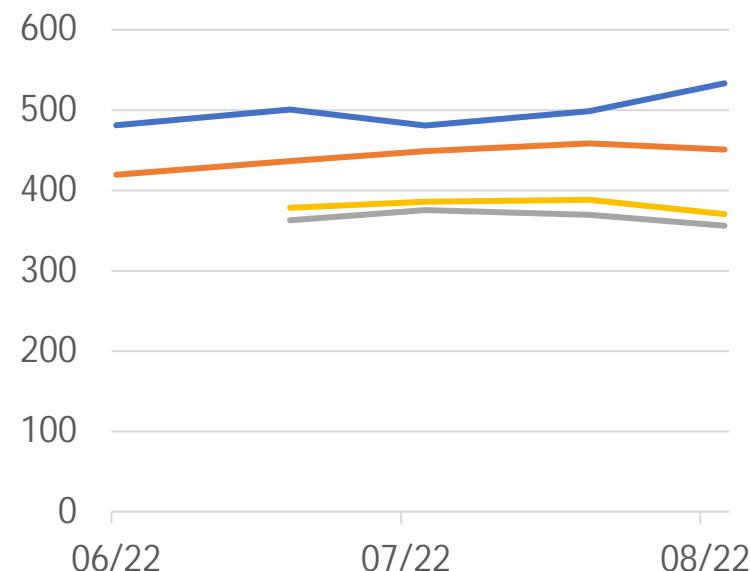

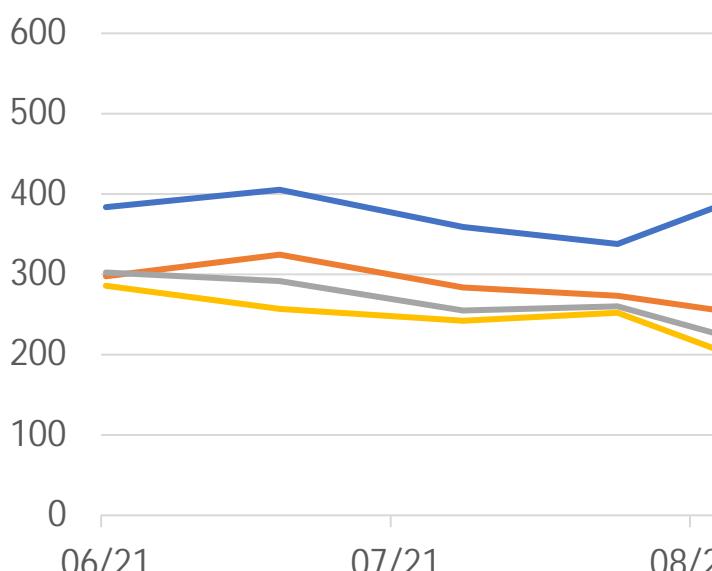

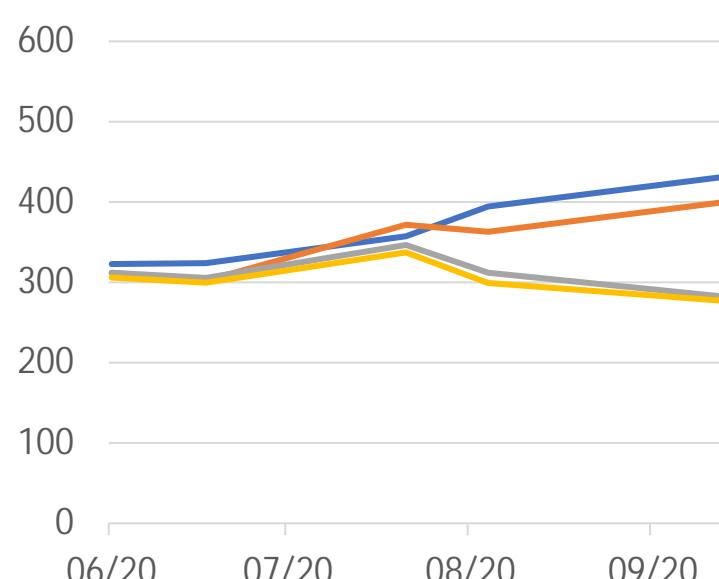

FV

Humidité du sol à 25 cm

Alimentation Azotée : indice N-Tester

Conclusions et perspectives
